

Level, pencil, awl, hammer, drill, drill bit 6 mm, cross screwdriver, silicone caulking gun.

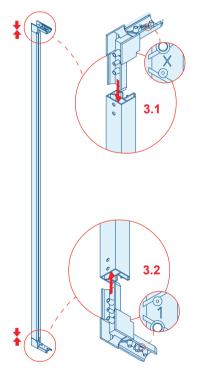

SECOND STAGE

FIRST STAGE

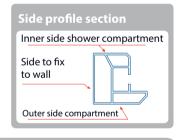

Take the right-side profile, which has two small holes (in the middle) for fixing the magnetic plate (Fig. 2.1) and place it, as shown in the figure, with the widest part facing outward. Place an angle bracket marked by the number "1" in the upper part (Fig. 2.2) and an angle bracket marked by an "X" in the lower part (Fig. 2.3).

IMPORTANT: The sides of the angle bracket marked by the "X" and "1" should not be inserted within the profile, but must remain outside, so that symbols remain visible.

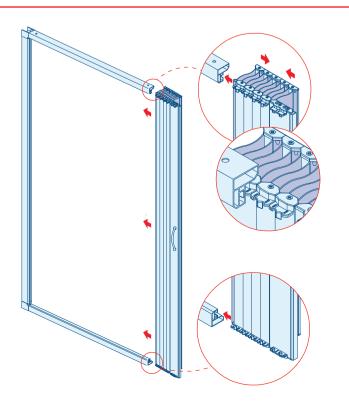

THIRD STAGE

Take the left-side profile and place it, as shown in the figure, with the widest part facing outward. Place an angle bracket marked by the number "1" in the upper part (Fig. 3.1) and an angle bracket marked by an "X" in the lower part (Fig. 3.2). IMPORTANT: The sides of the angle bracket marked by the "X" and "1" should not be inserted within the profile, but must remain outside, so that symbols remain visible

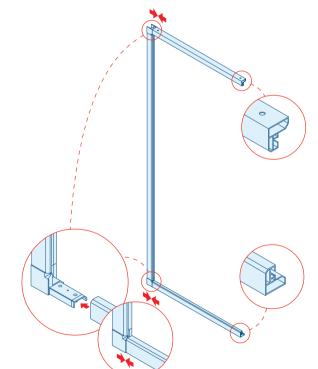

Assembly instructions

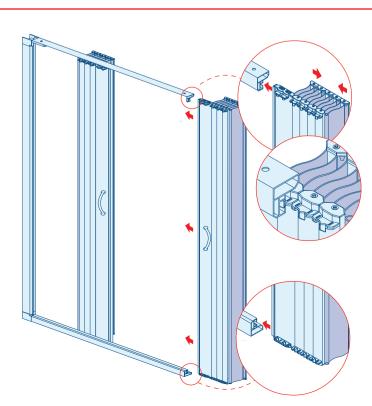

Slide the left folding door in both upper and lower rail profile, as shown in figure, making sure that all door supports are inserted in the rail profile. To make the operation easier cluster the folding doors.

Insert the upper and lower rail profile in the angle brackets of the previously assembled left side profile.

Slide the right folding door in both upper and lower rail profile, as shown in figure, making sure that all door supports are inserted in the rail profile. To make the operation easier cluster the folding doors.
